Lean & Green Michigan™ PACE Program

Executive Summary

Public Act 270 of 2010 (“Act 270”) authorizes local units of government to adopt Property Assessed Clean Energy (“PACE”) programs to promote the installation of energy efficiency improvements and renewable energy systems by owners of commercial or industrial property within a district designated by the local government.

Act 270 authorizes the assessment of properties for the cost of the energy projects and allows private commercial lenders to finance energy projects. It further authorizes local units of government to issue bonds, notes and other indebtedness to finance energy projects and for repayment to lenders through a voluntary property assessment. The property assessment remains with the property and has the same priority as property tax liens and assessment liens in the event of foreclosure.

Lean & Green Michigan™ (“LAGM”) has developed a collaborative approach to initiating PACE programs for local units of government by standardizing the administrative and legal process under which PACE programs are created and administered. Several local units of government throughout the state have or are in the process of joining LAGM utilizing a “shared services” approach to eliminate upfront and ongoing program costs. Further, this approach allows property owners to utilize a standardized process for PACE financing as they pursue PACE support in multiple jurisdictions throughout the state.

The property eligibility requirements as outlined in Act 270 are as follows:

- Property is privately owned commercial or industrial real property within the City of Southfield’s jurisdictional boundaries, which may be owned by any individual or private entity, whether for-profit or non-profit. MCL 460.933(g). Multi-family residential property is included in the definition of commercial property.
- There are no delinquent taxes, special assessments, or water or sewer charges on the property. The Authorized Official, at his or her discretion, may disqualify properties that although not currently delinquent, have been delinquent within six months of the application’s submission. MCL 460.941(2)(a).
- There are no delinquent assessments on the property under a PACE program. MCL 460.941(2)(b).
- The term of assessment must not exceed the useful life of the energy project paid for by the assessment. Projects that consist of multiple energy efficiency improvements or renewable energy systems with varying lengths of useful life may blend the lengths to determine an overall assessment term that does not exceed the useful life of the improvements in aggregate. MCL 460.939(i).

- An appropriate ratio must be determined for the amount of assessment in relation to the assessed value of the property. The maximum allowed ratio will be determined on a project-by-project basis by LEP and shall not exceed 25% of the State Equalized Value without written approval of the Authorized Official. MCL 460.939(j).
- Written consent from the mortgage holder must be obtained if the property is subject to a mortgage. MCL 460.939(k).
- A baseline energy audit must be conducted for the property that is approved by LEP and the Authorized Official. Such approval may be granted retroactively if the audit meets the standards of LAGM. MCL 460.939(o).
- For projects financed with more than \$250,000 in assessments, a performance guarantee must be provided by the contractor(s) for achieving a savings to investment ratio greater than one (1). The performance guarantee must meet the standards set by LEP. MCL 460.939(p).
- For projects financed with more than \$250,000 in assessments, an agreement to conduct annual energy and financial audits demonstrating energy savings must be established with committed financial and logistical arrangements for ongoing verification and measurement of energy savings that meet standards set by LEP. MCL 460.939(p).
- Bonds or notes issued under Act 270 shall **not** be general obligations of the local unit of government, but shall be secured by the voluntary assessments and other security mechanisms provided in the statutes. MCL 460.945(2).

LAGM is developing and will continue to develop an active roster of financial institutions, institutional investors and other sources of private capital available to finance PACE projects in Michigan. The City of Southfield also authorizes the use of owner-arranged financing from commercial lenders to finance qualified energy projects under the Program.

The City of Southfield may also raise capital to finance qualified energy projects from the sale of bonds or notes, or may finance qualified energy projects under the Program from funds available to it from any other source.

Each contract will require and provide adequate funding for monitoring and verification of energy savings throughout the life of the special assessment, to be conducted by independent third parties and/or dedicated software, as determined appropriate by the Authorized Official and LEP for each project. LEP shall conduct an independent technical and financial review, of the audit at the property owners expense, as part of the application process for projects under the PACE Program.

16. Projects Over \$250,000

As set forth in the PACE Special Assessment Agreement attached as Appendix A, energy projects financed with more than \$250,000 require ongoing measurements to establish energy savings and a guarantee from the contractor that the energy project will achieve a savings to investment ratio greater than one (1). The provisions to provide for ongoing measurement and the performance guarantee shall be included with the PACE Program Application, attached as Appendix B.

Lean & Green Michigan™ PACE Program

PROGRAM APPLICATION

Public Act 270 of 2010 (“Act 270”) authorizes local units of government to adopt Property Assessed Clean Energy (“PACE”) programs to promote the installation of energy efficiency improvements and renewable energy systems by owners of commercial or industrial property within a district designated by the City of Southfield. Act 270 allows private commercial lenders to finance energy projects and authorizes local units of government to issue bonds, notes and other indebtedness; and authorizes the assessment of properties for the cost of the energy projects. Act 270 provides for repayment to local governments through a voluntary property assessment. The property assessment remains with the property and has the same priority as other property tax and assessment liens in the event of foreclosure.

LAGM™ has developed a PACE program that provides voluntary special assessments for certain energy efficiency improvements and renewable energy systems that are associated with real property.

The property eligibility requirements are as follows:

- Property is privately owned commercial or industrial real property within the City of Southfield’s jurisdictional boundaries, which may be owned by any individual or private entity, whether for-profit or non-profit. MCL 460.933(g). Multi-family residential property is included in the definition of commercial property.
- There are no delinquent taxes, special assessments, or water or sewer charges on the property. The Authorized Official at his or her discretion, may disqualify properties that although not currently delinquent, have been delinquent within six months of the application’s submission. MCL 460.941(2)(a).
- There are no delinquent assessments on the property under a PACE program. MCL 460.941(2)(b).
- The term of assessment must not exceed the useful life of the energy project paid for by the assessment. Projects that consist of multiple energy efficiency improvements or renewable energy systems with varying lengths of useful life may blend the lengths to determine an overall assessment term that does not exceed the useful life of the improvements in aggregate. MCL 460.939(i).
- An appropriate ratio must be determined for the amount of assessment in relation to the assessed value of the property. The maximum allowed ratio will be determined on a project-by-project basis by LEP and shall not exceed 25% of the State Equalized Value without written approval of the Authorized Official. MCL 460.939(j).
- Written consent from the mortgage holder must be obtained if the property is subject to a mortgage. MCL 460.939(k).
- A baseline energy audit must be conducted for the property that is approved by LEP and the Authorized Official. Such approval may be granted retroactively if the audit meets the standards of LAGM. MCL 460.939(o).

PACE Program Application
APPENDIX B

- For projects financed with more than \$250,000 in assessments, a performance guarantee must be provided by the contractor(s) for achieving a savings to investment ratio greater than one (1). The performance guarantee must meet the standards set by LEP. MCL 460.939(p).
- For projects financed with more than \$250,000 in assessments, an agreement to conduct annual energy and financial audits demonstrating energy savings must be established with committed financial and logistical arrangements for ongoing verification and measurement of energy savings that meet standards set by LEP. MCL 460.939(p).
- Bonds or notes issued under Act 270 shall **not** be general obligations of the local unit of government, but shall be secured by the voluntary assessments and other security mechanism provided in the statutes. MCL 460.945(2).
- The applicant assumes all risk with respect to the implementation of a PACE Program in respect of the applicant's property. The City of Southfield is an accommodation party only, and is providing access to the PACE Program so as to enable property owners to make decisions regarding energy improvements to the property owner's property in a manner which allows the property owner to make the improvements in a cost-effective manner and for the property owner's benefit.

Energy projects that may be eligible for PACE assessments include, but are not limited to: equipment, devices, or materials intended to decrease energy consumption, including, but not limited to, all of the following: insulation in walls, roofs, floors, foundations, or heating and cooling distribution systems; storm windows and doors; multi-glazed windows and doors; heat-absorbing or heat-reflective glazed and coated window and door systems; and additional glazing, reductions in glass area, and other window and door system modifications that reduce energy consumption; automated energy control systems; heating, ventilating, or air-conditioning and distribution system modifications or replacements; caulking, weather-stripping, and air sealing; replacement or modification of lighting fixtures to reduce the energy use of the lighting system; energy recovery systems; day lighting systems; installation or upgrade of electrical wiring or outlets to charge a motor vehicle that is fully or partially powered by electricity; measures to reduce the usage of water or increases the efficiency of water usage; any other installation or modification of equipment, devices, or materials approved as a utility cost-savings measure by the City Council; and a fixture, product, device, or interacting group of fixtures, products, or devices on the customer's side of the meter that use one (1) or more renewable energy resources to generate electricity, but does not include an incinerator or digester.
