The City of Southfield

Section 25 – Area 7 and 8 Water Main and Sanitary Sewer Replacement Project

The week of June 20, 2021, weather permitting, the contractor will begin working on your street installing water main. During water main construction, access will be limited and you are advised to park on adjacent streets during working hours (7a-7p) to avoid travel delays. Additional flyers will be distributed in advance of necessary water service interruptions. This can be expected to occur approximately 3 times during the water main construction. When the contractor will be working on sewer construction and removing the road for paving, you will have **no** access to your driveway. If you have any special needs, please contact the consulting engineer listed below.

You will receive additional flyers updating you on any items that may affect you as the construction schedule proceeds. If you wish to receive email updates, please visit the City's website at www.cityofsouthfield.com and go to the "Construction Projects" tab and the "Section 25 – Area 7 and 8" project page and sign up. Thank you for your patience during this short term inconvenience. This \$6 Million project will result in long term improvements for your neighborhood.

Every effort will be made to minimize the inconvenience to area residents. Should you have a complaint or question, please notify the Consulting Engineer listed in bold below. Thank you.
